Product Environmental Profile

Pop-up box to be equipped - Brushed stainless steel finish

■ LEGRAND'S ENVIRONMENTAL COMMITMENTS

• Incorporate environmental management into our industrial sites

Of all Legrand sites worldwide, over 80% are ISO 14001-certified (sites belonging to the Group for more than five years).

• Involve the environment in product design

Provide our customers with all relevant information (composition, consumption, end of life, etc.). Reduce the environmental impact of products over their whole life cycle.

• Offer our customers environmentally friendly solutions

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

■ REFERENCE PRODUCT ■

Connect a workstation remote from the wall, from a concrete or raised access floors or directly from the furniture (desks, meeting room tables, etc), to the energy and communication networks for 20 years, via 2 x 3 modules Mosaic or Arteor sockets outlets.

POP-UP BOX TO BE EQUIPPED - 2 X 3 MODULES - BRUSHED STAINLESS STEEL FINISH.

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

■ PRODUCTS CONCERNED

The environmental data are representative of the following products:

■ CONSTITUENT MATERIALS I

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It contains no substances covered by the RoHS directive (2002/95/EC and its revision 2011/65/EC). It contains none of the 138 substances in the candidate list of the REACH regulation dated 19/12/2012.

Total weight of	
Reference Product	1143 g (with unit packaging)

Plastics as % of weight		Metals as % of weight		Other as % of weight		
PC	3,1 %	Al	7,4 %	Cables/electric wires	1,3 %	
PVC	1,1 %	Steel	11,9 %			
Other plastics	0,1 %	Zamak	63,0 %			
РОМ	0,1 %	Copper alloys	0,6 %			
				Packaging as % of weight		
				Paper	10,8 %	
				PE	0,6 %	
Total plastics	4,5 %	Total metals	82,9 %	Total other and packaging	12,7 %	

Estimated recycled material content: 23 % of weight.

■ MANUFACTURE ■

This Reference Product comes from a site that observes the applicable legislation for industrial sites.

■ DISTRIBUTION ■

Products are distributed from logistics centres located with a view to optimize transport efficiency. The Reference Product is therefore transported over an average distance of 920 km by road and 5958 km by sea from our warehouse to the local point of distribution into the market all around the world.

Packaging is compliant with applicable regulation. At their end of life the recyclability rate is 95 % (in % of packaging weight).

■ INSTALLATION I

Installation components not delivered with the product are not taken into account.

USE

Servicing and maintenance:

under normal conditions of use, this type of product requires no servicing or maintenance.

Consumable:

no consumables are necessary to use this type of product.

Product Environmental Profile

Pop-up box to be equipped - Brushed stainless steel finish

■ END OF LIFE I

Product end of life management is integrated into product design by the development teams. The disassembly and sorting of components or materials is made as easy as possible with a view to recycling or another form of reuse.

• Recyclability rate:

Calculated using the method described in technical report IEC/TR 62635, the recyclability rate of the product is estimated at 90 %. This value is based on data collected from a technological channel operating on an industrial basis. It does not prejudge the effective use of the channel for electrical and electronic products at the end of their life.

Separated into:

- plastic materials (excluding packaging) : 4 % : 75 % - metal materials (excluding packaging) - other materials (excluding packaging) : 0 % - packaging (all types of materials) : 10 %

■ ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end-of-life. It is representative from worlwide marketed products.

The following modelling elements were taken into account:

Manufacture	Unit packaging taken into account. As required by the "PEP ecopassport" programme all transport for the manufacturing of the Reference Product, including materials and components, has been taken in account.						
Distribution	Transport between the last Group distribution centre and an average delivery to the sales area.						
Installation	Installation components not delivered with the product are not taken into account.						
Use	 Under normal conditions of use, this type of product requires no servicing or maintenance. No consumables are necessary to use this type of product. Product category: PSR-0003-ed1-EN-2012 02 02 «Cable management solutions». Use scenario: no energy consumption during the 20 years working life. This modelling duration does not constitute a minimum durability requirement. Energy model: Electricity (China) - 2009 						
End of life	In view of the data avalaible on the date of creation of the document, and in accordance with the requirements of the PCR of the «PEP ecopassport» programme, transport of the Reference Product by road only once, over a distance of 1000 km, to a processing site at end of life was counted.						
Software used	Software used EIME V5 & Database version: Legrand_2012_10_31_version_3, made from the database CODDE-2012-07.

The environmental impacts of the Reference Product are representative of the products covered by the PEP, which therefore constitute a homogeneous environmental family. The environmental impact of the system, described in this document and different of the Reference Product, can be estimated by weighting the environmental impacts of the Reference Product by the corresponding factors (see p. 5/5).

The values of these impacts are valid for the context specified in this document. They must not be used directly to draw up the environmental balance sheet for the installation.
